## SPENCER TO DEMONSTRATE ENERGY WATCHER® CONTROL SYSTEM AT CAR CARE WORLD EXPO

Visitors to the 2010 Car Care World Expo May 12 to 14 at the Las Vegas Convention Center will have an opportunity to talk directly with the vacuum systems experts who design solutions for the industry's most demanding customers.

[The Spencer Turbine Company's](#) solutions for central vacuum systems at car rental centers at Orlando International Airport in Florida, Phoenix Sky Harbor International in Arizona, and McCarran International in Las Vegas are helping those operations turn their vehicles over quickly and efficiently.

The company's technical team will share the same expertise with Car Care World Expo visitors and exhibit central vacuum cleaning systems and other products in Booth 2514. The exhibit will also include demonstrations of the company's Energy Watcher® control system. The Energy Watcher reduces energy use on Spencer CarVac™ Series C vacuum systems.

By keeping an eye on operating speed, the Energy Watcher helps reduce energy use. When the vacuum cleaning system starts, Energy Watcher ramps up to full speed, and when it senses that operators are no longer using it, the Energy Watcher reduces the vacuum producer speed and remains at reduced speed until a vacuum hose and tool is removed from the hanger for use again.

Spencer is a long-time participant at the conference, which attracts car care professionals from key industry segments, including owners and operators of carwashes, detailing shops, auto auctions, quick lube facilities, and auto rental agencies worldwide.

In addition to demonstrating the [CarVac Series C](#) vacuum system with Energy Watcher control, Spencer's exhibit also includes an Island Knockout separator, WaterTrap® separator, metal tubing and fittings, and vacuum hoses and tools.

Spencer CarVac Series C systems are available from 10 to 25 hp for three to eight operators. Spencer can also work with customers who need even more capacity by combining many types of industrial vacuum cleaning modules into a single, integrated system with as many drops as required.

Additional car care industry products from Spencer include an Island Adapter Kit, Side-Saddle™ CarVac with 90° Access, and Piggyback™ Dual Vacuum Producer Unit. Systems can be modified for operation at high altitudes and power conversions from 50 Hz to 60 Hz power depending upon voltage requirements can be made.

Spencer's technical experts will be available during the following exhibition hours:

**Las Vegas Convention Center, Booth 2514**  
**Wednesday, May 12, 11 a.m. to 5 p.m.**  
**Thursday, May 13, 11 a.m. to 5 p.m.**  
**Friday, May 14, 8 a.m. to noon**
