SPENCER – YOUR SYSTEMS PARTNER TO EXHIBIT AT WEFTEC: VISIT BOOTH NO. 1644 – Hall A OCTOBER 12-14, 2009

The Spencer Turbine Company will exhibit its Digester Gas Booster “Duplex” Skid Package and other energy-efficient and green products at the upcoming Water Environment Federation Technology Exhibition and Conference (WEFTEC). The conference, which runs October 10 through 14 at Orange County Convention Center, is organized by the Water Environment Federation (WEF), a not-for-profit technical and educational organization dedicated to preserving and enhancing the global water environment. The conference is the largest annual water and wastewater treatment event in the world.

Each year WEFTEC is attended by domestic and international engineers, scientists, managers and government officials responsible for municipal and industrial wastewater collection and treatment systems, drinking-water treatment, groundwater protection and remediation programs.

Exhibition dates and hours:

Monday, October 12	9:00 am – 5:00 pm
Tuesday, October 13	9:00 am – 5:00 pm
Wednesday, October 14	9:00 am – 5:00 pm

Located in Hall A, Booth No. 1644, at the Orange County Convention Center, Spencer product managers and engineering experts will show and discuss the Digester Gas Booster “Duplex” Skid Package. The company’s custom engineered and fabricated systems are designed for handling digester gas and raising its pressure to desired levels at wastewater treatment facilities that utilize waste as an energy source. The skid package on display includes two hermetically sealed gas boosters with steel casings, anodized aluminum impellers, valves, piping and controls all mounted on a prepiped and prewired compact skid.

Spencer will also feature its Power Mizer® multistage cast centrifugal blower. This product’s uniquely designed aerodynamic components provide energy-efficient airflow from blower inlet to discharge. Power Mizer blowers—part of Spencer’s high-efficiency aeration air delivery systems—can help reduce energy operating costs when coupled with variable frequency drives, DO control logic, operator interface, modem communication software and blower protection devices.

Contact Spencer Marketing at (860) 688-8361, Ext. 210 or email marketing@spencer-air.com if you would like more information regarding Spencer’s exhibition plans in advance of the conference. For WEFTEC conference program details, visit www.weftec.org.
