Mobile Unit

Shown with optional HEPA filter, hose and tools.

Spencer® FastVac® Vacuum Cleaning System

- Serves one or two operators simultaneously
- High-efficiency, two-stage cartridge separator
- Continuous-duty, quiet operation, low maintenance
- Stationary and mobile units available
- Optional HEPA filters available

The Spencer FastVac system is a solution to the need for a compact, cost-effective, one or two operator central vacuum system. This heavy-duty, industrially rated vacuum system is ideal for a variety of general cleaning applications and high velocity dust collection. The system provides continuous-duty and quiet operation, combined with low maintenance and high filtration efficiency.

Standard FastVac units are designed for 60 hertz operation and sea level applications (for 50 hertz or above sea level, contact factory). They are equipped with a Vortex® regenerative vacuum producer, two-stage separator with a cartridge filter and a cam actuated quick-release dirt can. The stationary system is interconnected and mounted on a steel floor stand, ready for installation. A mobile unit mounted on rubber casters is also available.
