## Combustible Dust Testing Facilities

**Don't risk it all. Comply with NFPA 652 / 654 by September 7, 2018.**

OSHA specifies a list of materials that may create a hazard. If you have any on the OSHA list – or any other potentially explosive dusts – a DHA must be completed to ensure you properly identify them and mitigate all risk.

---

**Following is a list of testing facilities that can perform DHA testing**

---

### **Chilworth Technology**

Princeton, NJ  
609.799.4449  
[www.chilworth.com](http://www.chilworth.com)
